

UC San Diego is a center for technological innovation.

The English for Engineering & Technology program is suitable for university-level students who have high-intermediate to advanced levels of English and are:

- studying a field of engineering or computer science
- interested in improving their English through the study of various science and technology topics
- interested in improving their technical writing skills

Tuition: \$2,500 USD

International Student Service fee: \$140

UCSD Extension medical insurance: \$180

Books and Materials: about \$100

Contact: ipmarketing@ucsd.edu

This program features:

- a total of 80 program hours, 20 hours per week
- mastery of specific engineering and technology vocabulary, as well as general advanced vocabulary and expressions for speaking and writing
- improvement in the ability to effectively communicate in English in scientific discussion
- expert guest speakers from key sectors
- certificate of completion with satisfactory academic achievement in all courses

Study topics may include:

- renewable energy
- digital information
- satellite communication
- biomedical engineering
- aerial robotics
- artificial intelligence
- mechanical design
- manufacturing
- design materials
- computer software engineering
- technical writing

2017 dates: ■ July 3-28 ■ July 31-August 25
